

# One-x-Connection

## A Modern Eligibility and Enrollment Solution: Better Connections, More Flexibility

### Design Principles

OBJECTIVE	FEATURES
<p><b>Help more people access and retain benefits</b></p>	<ul style="list-style-type: none"> <li>• Multi-benefit eligibility and enrollment</li> <li>• Facilitation of electronic applications for federal programs</li> <li>• Online enrollment for local programs</li> </ul>
<p><b>Protect people's information</b></p>	<ul style="list-style-type: none"> <li>• Minimally necessary data collection</li> <li>• Data and documents segregated and classified at person level</li> <li>• Compliant with key federal and state privacy and security standards</li> </ul>
<p><b>Give assisters the tools they need to support their clients</b></p>	<ul style="list-style-type: none"> <li>• Modern and accessible user interface</li> <li>• Dynamic questioning</li> <li>• Faster data entry</li> <li>• Workload management tools</li> </ul>
<p><b>Provide control and flexibility for administrators</b></p>	<ul style="list-style-type: none"> <li>• Role-based access</li> <li>• Transparency of rules and client control for local program questions and rules</li> <li>• Configurable functionality to support individual client workflow</li> </ul>
<p><b>Support rigorous data analytics and reporting</b></p>	<ul style="list-style-type: none"> <li>• Supports near real-time analytics</li> <li>• User-friendly data visualization module</li> <li>• Generation of interactive reports in multiple formats</li> </ul>

## Architecture Principles

ATTRIBUTE	VALUE	TECHNOLOGY
<b>Modular</b>	Gives clients the option to implement individual components, such as quick screener, business rules engine, automated document management, and data analytics and visualization.	<ul style="list-style-type: none"> <li>• Micro-services</li> <li>• Independent provisioning/ deployment</li> <li>• Continuous Integration and Continuous Delivery</li> </ul>
<b>Configurable</b>	Supports client control over local program data intake, eligibility rules and enrollment requirements.	<ul style="list-style-type: none"> <li>• Dynamic data-driven Forms Engine</li> <li>• Business Rules Engine</li> <li>• Client self-configuration module</li> </ul>
<b>Secure</b>	Provides extensive logging and audit capabilities to support monitoring of data integrity. Protection against data loss and unauthorized access. Meets CMS data exchange requirements.	Compliant with: <ul style="list-style-type: none"> <li>• FISMA Moderate (NIST 800-53)</li> <li>• HIPAA</li> <li>• FIPS</li> <li>• SOC and other regulatory audit requirements</li> </ul>
<b>Scalable</b>	Enables responsive user interface experience. Supports efficient performance monitoring and handles peak usage scenarios.	<ul style="list-style-type: none"> <li>• Cloud-native n-tier architecture</li> <li>• Containerization</li> <li>• Auto-scaling</li> </ul>
<b>Open/Interoperable</b>	Allows for bi-directional information exchange with external systems, prevents vendor lock-in, and supports more efficient maintenance and operations.	<ul style="list-style-type: none"> <li>• REST APIs and SOAP services</li> <li>• Industry-standard protocols</li> <li>• Leverages best-of-class COTS</li> </ul>
